

WELCOME TO THE LAUNCH OF THE COOPER VIDEO WALL AT COOPER DESIGN SPACE

After considerable thought, time and procrastination, the Cooper Building Lobby has finally been remodeled. When I first started thinking about this project, one of my major inspirations was how to create an environment that fully embodies the Cooper Design Space and bring to life the spirit and vibe of our tenants and the many individuals who come through the space. It became very apparent that creativity is the bond that ties us all together. So how do you showcase creativity?

In conceiving the open space of the lobby we were excited to explore ways to incorporate an open feel to the strong bones of the original space. We are focused on finding dynamic ways to explore the relationships between LA's contemporary fashion world and the dynamic audio and visual worlds that inspire us. With that in mind, the Cooper Video Wall was born.

I am proud to welcome all of you to into this newly defined space—one that marries the history of its architecture with an exciting roster of work we have put together to surprise, entertain and inspire. In keeping with the ideal of presenting to fashion retailers collections of progressive contemporary design, we look forward to presenting the Cooper Video Wall and lobby as an intimate venue premiering innovative visual and audio treats. We are excited to work with Flux in curating an exciting collection that spans contemporary photography, art films and music videos.

Enjoy!

Steve Hirsh
